**A N M O R**

**A R M E N I A N   T U R Q U O I S E**

*Our purpose is to provide our customers with high quality, luxurious product, with its unique color and characteristics. From high mountainous regions to fine jewelry store stands, Armenian Turquoise will shed shine to any masterpiece and bring smile to your dearest one's face as an unforgettable gift that expresses love, appreciation and admiration.*

*We are a mining company located in Armenia which specializes in excavation and extraction of natural turquoise since 2014. We are the only legal turquoise extractor in the Teghut copper mine in Armenia and guarantee constant and long term supply of turquoise, accompanied with all the required certificates of authenticity.*

*Anmor is the first legal turquoise producer and seller in Armenia. The history of Armenian turquoise dates back to many centuries. Building upon the thousands years of experience in handling turquoise, we incorporate that knowledge and expertise into our current operations, using high-end technology to our advantage.*

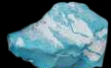

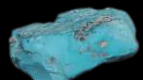

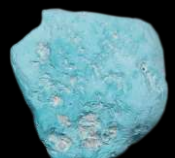

*Our product is graded by color, size and hardness, and we can offer a selection of both natural and treated (stabilized) stones.*

*Our stones are called “Anmoruk”, which in Armenian means the Forget-Me-Not flower, the color of which our turquoise is similar to.*

# HOW WE SORT OUR STONES

## SIZES:

1 & 2		5 - 10 mm
3		15 - 20 mm
4		25 - 30 mm
5		30 - 35 mm
6		35 - 40 mm
7		40 - 55 mm
8 & 9		55 - 60+ mm

## HARDNESSES:

**“NATURAL”** – The hardness of these stones allows you to cut and turn them into ready products without stabilization or other treatment.

**“HARD CHALK”** – These stones are softer than the “Natural” ones, and require treatment before cutting or polishing, however some types of shapes can be cut without threatening the stones.

**“CHALK”** - These stones have the lowest hardness and they have to undergo special treatment before being cut.

**“STABILIZED”** – We can stabilize stones of any of the aforementioned grade prior to shipping to our customers upon request. We do not manipulate the stone color during the treatment and only use it to improve cutting and polishing qualities of the stone.

## COLORS:

### BLUE

The most sought after color of turquoise in the world which Nature has given us and which we are proud to introduce.

### DEEP BLUE

The rarest, bluest and hardest stones that can only be found in our mine.

### LIGHT GREEN

Blue with a slight green accent. The pictures will help you understand the difference.

### RARE COLORS

Various exotic colors that are hard to find on the turquoise market – from swamp-green to blue-grey.
